

The Quick Zip & Peek-A-Boo Shower Curtain More Innovations in Shower Curtain Technology

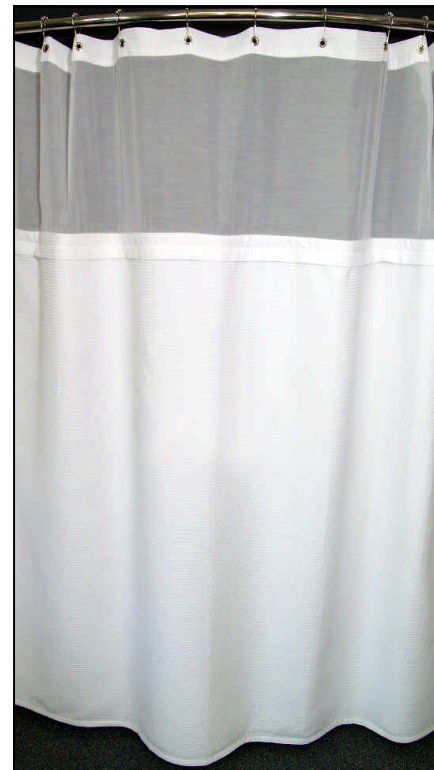

Remove the shower curtain without touching the hooks. The Quick Zip Shower Curtain, designed by Koni, is another brand enhancing design that makes removing the decorative face fabric or liner a zip. Each can be independently attached with a zipper, to a fixed header on the shower rod, a real time saver for housekeeping. The face or liner can be removed for laundering or to accommodate a new updated design scheme, without changing the header. Accent fabrics can be utilized on this stationary header as well, to provide a variety of design possibilities.

QuickZip, Peek-A-Boo Shower Curtain

Gone are the days of a limited light shower enclosure. The Peek-A-Boo Shower Curtain, designed by Koni, permits more light into the shower enclosure by topping the shower curtain with a 12" to 16" sheer panel, providing hotel guests with a brighter and safer shower experience.
